GUARANTEED

COMPLIANCE WITH STANDARDS

- / EN 1090
- / EN ISO 3834-2
- / ISO 9000 series

COMPLIANCE WITH WPS

/ Calibrated devices comply with the values required by the welding procedure specifications.

SAFETY

/ In the event of damage, proof of calibration may invalidate a complaint.

REPRODUCIBILITY

/ A calibrated welding system is the cornerstone for consistent quality.

	Calibration scope of service
Detailed system check	✓
Calibration to EN 50504	✓
Inspection of current, voltage and wire speed + optional gas flow	✓
Creation of a test record	✓
Calibration certificate issued	✓
Attachment of a calibration label	✓
Calibration of third-party devices	✓
Calibration by the manufacturer	✓
Calibration to precision or standard class	✓

Annual calibration is recommended by the manufacturer.

TIP: Combining a safety inspection with calibration saves time and money!
